#### PLANT/EQUIPMENT SAFETY ADVICE TO PURCHASERS

The Occupational Health & Safety Regulations 2017 (Regulation 90) requires suppliers of plant and equipment to provide written advice to a purchaser as to condition of the item and any known safety hazards or concerns. The information provided in this report is based on a visual inspection only. No physical testing has been conducted (eg. Wire rope testing, stress testing, structural/non-destructive testing, noise testing, vibration testing, brake testing, insulation testing, etc.) The item described within this report is being sold in an 'as-is' condition with all identified safety hazards or concerns outlined within this report.

Purchasers should conduct their own risk and hazard assessments to identify and control hazards prior to installing and/or using the equipment.

#### Potential Hazards

| Category 1: Major Potential Hazards |                                                                                                                                                                                                                                         |  |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Specific warnings or<br>conditions  | <ul> <li>Refer to any technical or operating manuals, safe use<br/>instructions that are made available</li> </ul>                                                                                                                      |  |
| Entanglement                        | <ul> <li>Lack of guarding</li> <li>PPE, Hair or other body parts caught in moving parts</li> <li>Rotating parts</li> </ul>                                                                                                              |  |
| Crushing                            | <ul> <li>Falling, uncontrolled or unexpected movement of item or<br/>load</li> <li>Item tipping or rolling over</li> <li>Being trapped under or between the item, and/or fixed<br/>structure</li> <li>Struck by moving parts</li> </ul> |  |

| Category 1: Major Potential Hazards |                                                                                                                                           |  |

IMPORTANT NOTICE: It is recommended that this item be further tested, inspected or dismantled by the purchaser as necessary to assess any further hazards which are currently unknown. Under the Occupational Health & Safety Regulation 2017 it is a requirement for the plant owner, employer and operator to exercise a duty of care in the supply and safe operation of plant. Accordingly, before this item is used at any workplace it must be in a fully operational, safe and serviceable condition.
